- Dance (tango, flamenco, bachata, salsa, ballet, arabic dance, danzón, etc.)
- Travel
- Paint
- Play with my cats

LANGUAGES

- Spanish-native
- English-Intermediate
- Italian-Basic

CECILIA GONZÁLEZ

FRONT-END DEVELOPER.

Over the years, I have learned to reinvent myself in different ways, thus surpassing my own limits. Embracing fear as a preamble to success. Thanks to technology, I have found the opportunity to have constant professional growth. I enjoy taking on new challenges and motivating the people around me so that together we can achieve any goal. Tenacity, creativity, responsibility, punctuality, and organizational skills are traits that define me. Perseverance lives with me day by day. When something motivates and excites me, I put my mind and heart into it, and that has always been my formula for success.

WORKING EXPERIENCE

Project: BurgerQueen-Api-Client

A small burger restaurant requires a system through which they can take orders using a tablet and send them to the kitchen for orderly and efficient preparation. Similarly, it can manage order requests, employees, and food items.

Project: MD-links

A library was created using Node to check if there are links in a file, determine their status, and identify the file where they are located. Thanks to a console interface, these responses are generated for requests..

Project: Social network

Creating connections between people through a social network to build a community of cat enthusiasts, called CatsSociety, with the aim of sharing knowledge based on cat owners' experiences. This will help improve the coexistence and understanding of these magical beings.

Project: Data lovers

Creating a solution based on the provided information from Studio Ghibli, by generating an attractive and intuitive user interface. This will make it easier for users to search for movies by applying various filters.

Project: Card validation

Designing an interface to verify valid credit card numbers for a travel website to Switzerland, with a focus on colors and images that instill confidence in the user and ensure secure transactions.

EDUCATION

- Front-end developer - Laboratoria Bootcamp April-October 2023
Based on various projects, an agile methodology, SCRUM, was developed, along with knowledge of the JavaScript language, and the use of HTML and CSS, as well as complementary tools.
- Bachelor's Degree in Biology - Universidad Nacional Autónoma de México (UNAM) 2011-2015 - Knowledge and skills to better understand the world we inhabit and develop scientific analysis.
